**Fibreglass** Mobile

#### **ACROPROPS**

#### **ACROPROPS**

**COST EFFECTIVE** 

ANTI-RUST

**VERSATILE** 

Acroprops are an aluminium structure used to support objects from falling down such as a ceiling that is about to cave in. They can be used in all sorts of environments and various styles are available to suit your needs. Acroprops are great to use in unstable environments that have a high likely hood of falling down.

## **ALUMINIUM KWIKSTAGE**

#### **ALUMINIUM KWIKSTAGE**

TIME SAVING

LIGHTWEIGHT

**ANTI-RUST** 

Whether it's commercial, residential or remedial, Aluminium will never let you down. It's easy to put together and the rust resistance makes it the ultimate choice for all outdoor projects.

# INSULATED HOARDING SCREENS

#### INSULATED HOARDING SCREENS

ELECTRICALLY INSULATED

AUS STANDARDS COMPLIANT

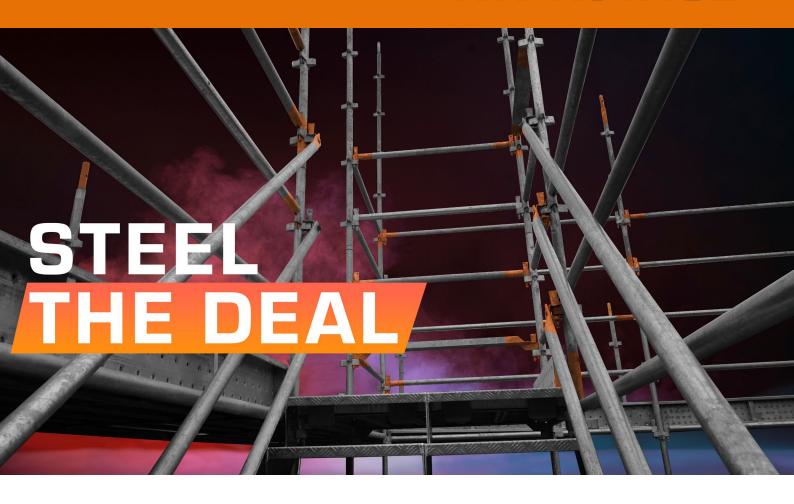

INNOVATIVE DESIGN

Our innovative electrically insulated screens are designed & approved to withstand 40 KV of current. This is one of the safest methods of protecting scaffold and construction workers near power-lines.

## STEEL **KWIKSTAGE**

#### STEEL **KWIKSTAGE**

SAFE PRODUCT

**ENVIRONMEN-TALLY FRIENDLY**  COST **EFFECTIVE** 

Steel Quickstage is a temporary metal scaffolding structure that is used during construction. Steel is one of the best materials that you can choose when it comes to scaffolding due to its dense nature. Steel is able to take a bigger working load than other materials and is considered the strongest.

## **ALUMINIUM** MOBILE

#### **ALUMINIUM MOBILE**

LIGHTWEIGHT

**ANTI-RUST** 

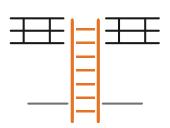

Aluminium Mobile Scaffolding is a metal structure that is used to perform activities on job sites - ideally on job sites that require much maneuvering around. Aluminium Mobile Scaffolds are also foldable which make them great for moving around in tight corridors.

## **ADJUSTABLE** STAIRS

#### **ADJUSTABLE STAIRS**

**INDUSTRIAL APPLICATIONS** 

**ALLOWS FOR** TRENCH ACCESS

Synergy's Adjustable stairs are made of marine grade aluminium sections. The staircase is self-angled because of the movable steps mounted in the frame. Can be easily installed to access any working level. Adjustable stairs can either latch on the scaffold or be bolted down to concrete or timber floors.

### **FIBREGLASS**

#### FIBREGLASS MOBILE

NON CONDUCTIVE

NON CORROSIVE

Fibreglass Scaffolding is a fibreglass structure that is used to perform activities on job sites. Fibreglass is particularly useful if working in a high-voltage environment as fibreglass doesn't conduct electricity. Fibreglass scaffolds are also lightweight, making them easy for transport and carrying around.
