v

FIBREGLASS *SCAFFOLDING*

Fiberglass scaffolding is lightweight, non-conductive, and resistant to corrosion, making it a durable and long-lasting solution for outdoor or harsh environments. It is an alternative to traditional steel or aluminium scaffolding and is used in applications where traditional scaffolding materials are not suitable, such as working near electrical or magnetic fields. It is also easy to assemble and disassemble, making it a convenient option for use in a variety of applications.

Fiberglass scaffolding is also highly resistant to weather damage, making it suitable for use in outdoor environments where traditional scaffolding materials may corrode or rust.

KWIKSTAGE *SCAFFOLDING*

Aluminium Kwik stage Modular scaffold is an easy-to-use, lightweight system that is simple and fast to erect, making it more cost-effective as it saves in labour costs.

Aluminium Kwik stage Modular Scaffold Designed to go where the commonly used steel scaffold cannot go. With its light weight design it can be built on any surfaces that has a low load rating such as roofs, tiled, paved areas, while still achieving medium duty rating of 450kgs.

CERTIFIED

Certified to Australian Standards AS/NZ 1576.3 with WorkSafe Design Registration.

LIGHTWEIGHT COMPONENTS

Almost a 70% Lighter than the steel counterpart.

GUARANTEE

10 years guarantee on all welds.

ANTI RUST

Components are Hot Dipped Galvanised (HDG) which prevents rusting and requires minimal maintenance.

DRY *HIRE*

When handling a one-off project, we recommend Hiring from us. By hiring equipment instead, you can save money on upfront costs, maintenance, repairs, and storage. Construction equipment is constantly evolving, with new models and features being introduced regularly, by hiring from us you can access the latest scaffolding and site equipment for your project.

STEEL KWIKSTAGE

Our Steel Kwikstage scaffolding is made from high-quality steel, which provides strength, durability, and resistance to corrosion. The system is also lightweight and easy to transport.

ALUMINIUM KWISTAGE

Our system is the most durable, lightweight type of modular scaffolding system on the market. We have an abundance of supply to hire.

MOBILE SCAFFOLD

Our durable mobile scaffoldings made from lightweight aluminium or fibreglass allows for easy assembly and transport.

TECHRING

Our System can support heavy loads whilst catering to most projects due to its strength and versatility. The key feature of the Ringlock system is the rosette, which is a circular metal disc with multiple holes around its perimeter.

FORMWORK

We hire several types of formwork equipment, including traditional timber formwork, steel formwork, props, shoring frames and Synform.
